Professional Summary

Experienced Senior Software Engineer with 14+ years of expertise in building and optimizing web applications using Python and PHP. Proficient in designing scalable systems, managing data pipelines, and implementing robust service provisioning solutions. Thrive in remote environments, effectively collaborating with cross-functional teams to deliver high-quality software solutions. Known for meticulous attention to detail, QA-focused development practices, and mentorship of junior engineers. Passionate about leveraging AI/ML principles to solve complex technical challenges.

Skills Summary

Programming Languages and Frameworks

Python: Django, FastAPI, Flask

PHP: Laravel, CakePHP, Magento, WordPress

Tools and Platforms

- **Data Analysis and Reporting:** JupyterLab, Pandas/NumPy, PowerBI
- **Virtualization:** Virtualizor, ESXi, SolusVM OpenStack, PXE/TFTP provisioning
- **Operating Systems:** Windows, MacOS, CentOS/RHEL/AlmaLinux, Debian/Ubuntu

Additional Skills

- Agile Methodology/Scrum Master (Standups, Spring Planning/Review/Retros)
- Extensive Full Stack Troubleshooting Experience
- Remote Communication and Team Collaboration Excellence

Education

Dakota State University | BS Computer Science | In Progress

Starting my senior year of a digital computer science degree specialized in artificial intelligence and machine learning with a cyber operations minor. Current GPA is 3.7 and courses in the underlying mathematics of current AI models, networking, and malware analysis have all greatly improved my overall computing and full stack knowledge.

Experience

Senior Software Engineer

A2 Hosting | Remote | **2019 – 2024**

- Designed and implemented a Django-based system for bare-metal server provisioning, enabling automated OS installation, configuration, and application deployment.
- Inherited and enhanced BI developer responsibilities, including managing ETL pipelines, creating detailed data analytics reports, and optimizing workflows for business insights.
- Spearheaded the integration of new features into billing and reporting systems, reducing manual intervention by 60%.
- Mentored junior and mid-level developers, fostering technical growth and improving team productivity.
- Contributed to architectural decisions, ensuring scalability and maintainability in software solutions.
- Authored comprehensive documentation for internal applications and processes, improving onboarding efficiency.

Senior Software Developer

Xennsoft | Remote | **2016 – 2018**

- Developed and maintained a white-label MLM platform, integrating WordPress for marketing and Magento for e-commerce.
- Collaborated on the design and implementation of an automated provisioning platform using Chef, reducing server deployment time by 40%.
- Worked closely with support staff to troubleshoot, replicate, and resolve software issues, ensuring a seamless user experience.

Team Lead

44 Interactive | Sioux Falls, SD | **2014 – 2015**

- Planned and estimated development work in collaboration with management and PM.
- Led agile software development methodology: sprints, reviews, planning
- Developed comprehensive frontend (JS, CSS) and backend (PHP) solutions to meet stakeholder requirements.
- Architected and developed custom MVC framework for software development.
- Facilitated developer growth through mentorship and career guidance.

Software Engineer II

Corrisoft | Lexington, KY | **2012 – 2013**

- Collaborated with engineering team, product design, and QA to meet stakeholder expectations regarding call center web app and mobile application for GPS monitoring of recently incarcerated individuals to reduce recidivism.
- Practiced agile methodology of sprint planning, sprints, sprint review.
- Worked closely with management on architectural and software design choices for complex new features.

Software Developer

Able Engine | Lexington, KY | **2010 – 2012**

- Developed comprehensive frontend and backend solutions in Drupal to meet complex requirements of multinational corporations.
- Worked with UX/Design team to implement pixel-accurate frontend per Photoshop templates.
- Led deployment and system administration of client Linux servers.

Awards and Acknowledgements

Monthly Core Values Award (A2 Hosting)

Received 12 Core Value Awards while working at A2 Hosting, which were the result of being the employee with the most colleague commendations for each specific A2 Core Value (Agile, Customer Focused, Collaborative, Curious, Passionate)

President's List Honors (Dakota State University)

Received President's List Honors for 4.0 cumulative semester GPA for past 5 semesters

President's List (Dakota State University)

Earned President's List Honors at Dakota State University with a 4.0 GPA for 5 consecutive semesters. While attending Dakota State University and working fulltime.
